PROFESSIONAL SUMMARY

Software Engineer with 3 years of experience in full-stack development and system analysis, currently specializing in frontend development with React and JavaScript. Enhanced frontend expertise through KodingUp Bootcamp, focusing on modern React development, JavaScript fundamentals, and building responsive web applications.

Experienced in React, JavaScript, Node.js, Laravel, PHP, MySQL, and REST APIs. Passionate about building scalable applications, clean code, and user-friendly digital experiences.

WORK EXPERIENCE

System Analyst

PT. Hartono Istana Teknologi (Polytron), Kudus, Indonesia

March 2026 - Present

- Gathered and translated requirements for 5+ application enhancement and development projects
- Analyzed business processes and proposed solutions that reduced manual workflows by up to 30%
- Produced technical specifications, system flows, and documentation to guide development teams
- Collaborated with business stakeholders and development teams to ensure on-time delivery of system implementations

Application Developer

PT. Hartono Istana Teknologi (Polytron), Kudus, Indonesia

June 2024 - March 2026

- Developed and maintained ERP modules supporting Finance, HR, and Payroll operations, used across multiple departments
- Built and integrated 20+ RESTful APIs for web applications and internal systems
- Improved application performance by optimizing database queries and refactoring legacy processes by 50%
- Implemented queue-based background jobs for report generation, notifications, and system automation to increase business process by 30%

Application Developer Internship

March 2023 - March 2024

PT. Hartono Istana Teknologi (Polytron), Kudus, Indonesia

- Developed RESTful APIs and CRUD modules for ERP system enhancements
- Assisted in feature development, bug fixing, and production issue investigation
- Collaborated with system analysts to deliver and maintain internal business applications
- Developed and maintained a Fixed Asset Management System, reducing manual asset tracking processes and improving transaction accuracy.

PROFESSIONAL PROJECT

Landezy – Frontend Engineer | 2026 – Present

- Developing a property marketplace platform using Next.js, React, and TypeScript
- Building responsive and reusable UI components for property listing and management workflows
- Integrating REST APIs, authentication, and frontend state management
- Collaborating with cross-functional teams to deliver new features and improve user experience

Kingdom of Glory Application | March 2025 - June 2025

- Develop using Next.js (Web), NestJS (Backend), React Native (Mobile)
- Contributed to frontend bug fixing and feature enhancements for web and mobile applications while leading backend API development and database design.
- A live application used by church members for seat booking, reading devotionals, and viewing service schedules.
- Website <https://kingdomofglory.church>

GKMI Anugerah | June 2025 - August 2025

- Develop using Laravel and MySQL
- Responsible for database design and REST API endpoint development to manage church event, media, and content data.
- A stable backend supporting the church website in managing various activities and digital content.
- Website <https://gkmi-anugerah.org>

SKILL

Soft Skill	Responsible, Problem-solving, Adaptability, Fast Learner
Hard Skill	React, Next.JS, JavaScript, TypeScript, HTML, CSS, PHP, GIT, Laravel, Node.js, NestJS, MySQL

CERTIFICATION

- Secure Code Corporate Training, Cyber Academy Indonesia, Nomor: SC02107253097, 2025
- Belajar Dasar Pemrograman JavaScript, Dicoding, Nomor: GRX5JGN5KX0M, 2025
- Certification of Mentoring Program by Binus SASC, Binus, 2022

EDUCATION

Binus University Alam Sutera Bachelor's Degree in <i>Computer Science</i> IPK: 3.85 / 4.00	Sept 2020 - April 2024
SMA Regina Pacis Surakarta High School in Science IPK: 90.87 / 100	June 2017 - June 2020

LANGUAGE

Indonesian	Native
English	Intermediate
